The Peoria Civic Center is located in Central Illinois, halfway between Chicago and St. Louis on the banks of the Illinois River. The Civic Center is located just off I-74 with easy access for patrons and clients. The facility is within walking distance of several hotels, restaurants, shops and a beautiful Riverfront that boasts year-round activities in downtown Peoria.

The Civic Center is a three building complex that was designed by nationally renowned architect Philip Johnson. The recent renovations, and the Civic Center's river-themed addition, were designed by HOK, a nationally renowned public assembly architectural firm from Kansas City. A glass arcade connects the 12,000-seat arena, 2,200 seat Theater, 110,000 square feet of continuous exhibit space, 27,000 sq. ft. ballroom and 15 additional breakout rooms totaling 17,000 sq. ft.

The Peoria Civic Center recently cut the ribbon on its \$55 million upgrade and expansion, making it the largest convention facility in downstate Illinois with more than 900,000 gross square feet in the entire complex.

With over 500 event days successfully coordinated each year, the Peoria Civic Center has a well-earned reputation for managing events and providing exceptional customer service.
